

Meet riger® 7.5 Phoenix

Calgary, AB – April 9, 2020 – we presented the latest version - **riger® 7.5 Phoenix**. This new release has an updated line-up of modules, features and data display tools designed to maximize the use and benefit of the software created for Oilfield Service and Rentals.

New Modules

1. Reservation and Backup modules
2. Job Costing module
3. Service Call module

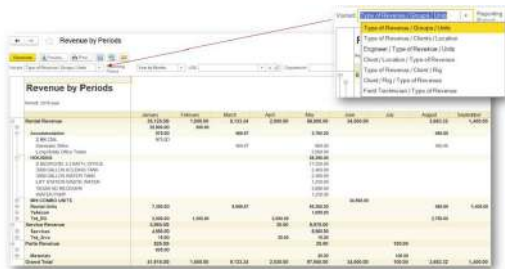

New Dashboards

1. Repair dashboard
2. Activity Log dashboard
3. RSA Kanban dashboard.

There are a lot of other additions and enhancements in this new version, e.g. Payroll Integration with QuickBooks, Out-of-Fleet and Construction-in-Progress Statuses, Pre-Delivery Inspections, and more.

Feature of the month - Reporting

The ability to generate reports in riger[®] is based on a simple “three-step” process:

- 1. Recording every single action in the system;
- 2. Store those records;
- 3. Provide report generation mechanism access.

Solving the complex pricing challenge

Manage prices in one multi-level system, send quotes on-the-fly from the mobile device, analyze and adjust pricing to stay competitive and more.

What Our Customers Say ...

“During implementation, it was refreshing to be able to work with people who had a good understanding of the industry and its general operations. This made for a quick implementation, and also brought up a constructive conversation which ultimately led to a much better end product.”
