

Meet Our New Site!

The RigER team has very exciting news! Last month we've rolled out a new and improved riger.us that features user-friendly design and is built to be lightning-fast and efficient. You can now find tons of information on riger® and its capabilities there, organized to be easy to find and understand.

We've worked hard to ensure that no matter how you interact with our website, we serve you an experience that's fast, usable, beautiful and accessible by everyone. Be sure to check our site for updates, new content and upcoming events!

Featured Event

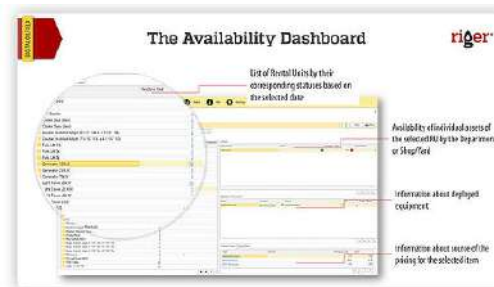

RigER Team BBQ

We have a great tradition to gather whole team for an outdoor BBQ party every June. This year we held it June 13, near Calgary, Canada. We had great time celebrating birthdays of a few of our team members, enjoying great weather, food and company.

It's official, riger® has 8 years history now!

Feature of the month - **Dispatching and Scheduling**

One of the core goals of riger® is to be the right tool for dispatchers by allowing to easily manage every single aspect of a job that can in any way be associated with dispatching: resource availability and management, deploying/returning equipment, service provision, repairs, inspections, maintenance, personnel management, and so on...

In Case You Missed It

We hosted 4 webinars last month. If you were not able to attend, you can always watch them on demand.

Watch Webinar

Mobile Oilfield

Being able to integrate mobile solutions into your daily oilfield operations is going to save a lot of time and other precious resources. When the integration is at the level that allows seamless interaction between desktop and mobile users, that can give your company an edge over the competition. See what it looks like in real life.

Watch Webinar

Business after COVID-19

During April and May we had a series of strategic sessions with business leaders: investors, managers, consultants, sales, operations, accountants, HR, and more. Now we would like to share with you all insights, thoughts and ideas. Watch the recording to learn more.

Watch Webinar

Oilfield Inventory Management

Real-time monitoring of the incoming and outgoing inventory allows to plan and do oilfield job dispatch right, avoid lost time spent to maintain the inventory data up-to-date manually, and improve cash-flow by eliminating unnecessary purchases of parts and consumables that may not need be ordered at all.

Watch Webinar

All Users Support Channels

Check this webinar to learn how to get the most out of riger® and become a super-user by utilizing all available resources, and how to receive support in minutes. We will show you the Users Support Portal, Support Request Types, Knowledge Base, Users Training, Digital Oilfield Academy.

What Our Customers Say ...

“... we wanted to find a software solution that would be flexible enough to be tailored towards our current workflow while at the same time, something with a robust platform and user friendly interface that would be reliable and easy to use.”

Managing Partner, Oilfield Service and Rentals, Houston, USA
