Service Calls

Check this webinar recording to learn how to track customers' requests, assign tasks to other employees, and notify clients about open calls in one integrated system. Having all customer details in the database gives the ability to create a new service call in seconds in your mobile device and send it for execution to the next responsible person.

What Our Customers Say ...

"We have been truly pleased with how riger® implementation turned out for our operations team. The ability to configure the system to accommodate our field and shop operations – from digital tickets to inspection and maintenance – is invaluable. "
