

New version Release - Meet RigER® 8.0 Odessa

For the past several months, our team has been working hard to add new features and enhancements to RigER® Oilfield Services ERP. Yesterday, we released the latest version – RigER® 8.0 Odessa.

This version adds new tools for greater efficiency, data management and information security.

What's new in RigER® 8.0 Odessa

Built-in Email Client

Allows you to keep all communication with your clients directly in RigER®. It gives you a lot of power to customize it by setting up multiple rules. You can create an Address book, various folders, arrange emails into work groups, create and save email templates, signatures and more...

Oilfield CRM

Was created to track sales activities and convert them to opportunities - from the initial contact and lead development stage to the closed deals stage, connecting everyone to a single database of contacts, activities, opportunities, price agreements, field tickets, and invoices.

Barcoding

This feature enables you to scan barcodes with the camera of a mobile device (phone, tablet, etc.). Now you can track assets efficiently and dispatch rental fleet faster.

Security Compliance

We are proud to announce that we protect data by meeting international security standards - we are ISO 27001 Certified.

RigER® Mobile ERP Suite

RigER® Mobile Apps leverage the latest RigER® 8.0 Odessa version to enable field workers, supervisors, and office staff to get work done faster and more easily while eliminating the errors, delays, and complications associated with traditional processes of paper, spreadsheets, and email. It also includes Thin Mobile Client that gives full access to all modules (Sales, Dispatching, Rentals, Repairs, Maintenance etc.) of the RigER Oilfield Services ERP enabling authorized users to create, change, and approve any document – from quote, to field ticket, to invoice in real time.

Check this video to learn more.

The advertisement features a yellow background with an oil rig in the distance. On the left, the text "Go Mobile!" is in large red font, with "DIGITAL OILFIELD SERVICES" below it. A smartphone in the center displays a "Field Ticket" form with various fields. A large play button icon is overlaid on the phone. To the right, the "rigger" logo is shown above "8.0 ODESSA". Below this, a vertical list of icons and labels includes: Field Ticket, Purchase Order, Oilfield CRM, Service Call, and OIS ERP.
